Belt Conveyor COVERS

Solution for built conveyors protection

WHAT WE DO?

We offer both standard and custom covers for belt conveyors
Consult our technical department

Cover for belt conveyor

The necessity to protect belt conveyors may arise from the weather, from the volatile characteristics of the conveyed material, or from the type of works plant, and also from European norms that require the covering of the total length of a belt conveyor in the open.

The covers proposed are made from galvanized sheet steel corrugated section. They are self-supporting, safe, easy to install and adjustable to any structure. On request they can be supplied in other materials or finished with special paint. They are available for all belt widths and supporting structure and can be supplied with opening windows for inspection and there are also removable covers and ventilated covers for hot environmental conditions.

They are maintenance free. The covers shown in our catalogue are the result of many years' experience and cooperation with engineering companies and constructors specializing in belt conveyor design.
